		MANGA CREATION Check points:	
		Story and Paneling:	
		1. Always utilize the power of the Double-Page spread.	
		The reader always sees two pages at a time.	
		Even with no images going across, treat the pages as one wide screen.	
		2. Make the reader WANT to turn page	
	27	The Manga world stands still, without the reader turning the page.	
	0 mm	Always make the last panel a reason to turn the page.	
		3. Talk to your characters - Make them 'act'	
		Manga is about animating your characters, making them 'feel' real.	
		Treat them as real people - Ask them if they feel natural, doing what they do.	
		Drawing :	
		1. Panels either:	
		"A: Fit within '180x270' / B: Go right to the edge (trim line)" - No in-betweens.	
		2. "To the edge"	
		Only towards the trimmed edges, and NOT towards the spine of the book.	
		3. Do not be afraid to try new ideas,	
		but be calm enough to ask yourself, if your idea is entertaining for the reader.	
		"DRAW LOTS, AND SHOW IT TO MANY PEOPLE!"	
		Joining SILENT MANGA AUDITION® is a great opportunity for	
		creators of all levels. http://www.manga-audition.com
